

# ► RELAXATION BED with Hi-low

## + COMFORT & WELL BEING

- Relieves the stress on the back.
- Electrical backrest, electrical leg rest with knee-bend.
- Adjustable height, suitable for all patients' sizes.
- User-friendly handset.

## + MODERN LOOK

- Head and footboards : surround in all-wood beech, inside in plywood and melamine.
- Wooden surround for the chassis and the mattress platform, wood tint matching the end boards.

- Mattress platform with wooden slats or carbon fibre slats.
- Wide choice of bed widths :  
**Single bed** : available in widths 90 cm to 160 cm.  
**Twin beds** : available in widths 140 cm to 180 cm.
- 240-v electrical actuators.

**EXCELLENT  
VALUE  
FOR  
MONEY**

**The Euro'Design® bed relieves your back and makes your everyday life a lot easier :**  
Considered as "the disease of the century", back pain affects 80% of people and 53% of the population state that they suffer from backache in the morning.

## 4 function remote control : Simple, ergonomic and functional !

- **Back rest** : choose the best back rest angle for you.
- **Variable height** : Adjust the electrical variable height to get in and out of bed.
- **Comfort position** : Synchronize the leg and back-rest angles for the best comfort.
- **Leg rest** : choose the best leg angle to facilitate blood flow.

# THE EURO'DESIGN®

We care for your care

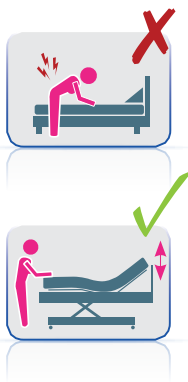

## ▶ STANDING AID of BEDTIME

The **adjustable height** is perfect for getting out of bed because the bed rises up to the hip level.

Moreover, the mattress platform is reinforced at the buttocks area and requires **less effort when getting out of bed**. Likewise, the bed can be raised to one's preferred height to get into bed.

## ▶ HOUSEWORK AID

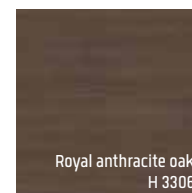

You will not have to bend down anymore to make the bed :  
changing the sheets is easy when **the bed is raised to chest level**.
